Scope of Work & Build Specification

Investment Operations Platform: CRM & Agents

Lua × Noblestride Capital Investments Ltd

Prepared for	Noblestride Capital Investments Ltd
Prepared by	Lua, Inc.
Document	Statement of Work (SOW) and configuration specification under the Lua Enterprise Agreement
Reference	Enterprise Agreement dated 15 May 2026, Appendix A
Purpose	Engineer-ready specification for configuring the CRM and agents
Version	2.0 · Draft for review
Date	1 June 2026
Classification	Privileged & Confidential

Contents

1. Purpose and how to use this document

This document does two jobs. It is the agreed Statement of Work under the Enterprise Agreement dated 15 May 2026, and it is the configuration specification an engineer uses to start building the CRM and agents.

Part I sets the scope and objectives. Part II is the data model: every entity, every field, its type, whether it is required, and its controlled values, drawn from Noblestride's existing trackers and scoping answers. Part III specifies the agents and integrations at the level of triggers, field mappings and human gates. Part IV covers reporting, delivery, commercials and the open items still to confirm.

Where a value or rule could not be fully confirmed without reading confidential deal data, it is marked as an open item in section 23 rather than guessed. Those items are the agenda for the discovery workshop and do not block the start of configuration.

Reading guide: field names in the data dictionary use Noblestride's existing column names where they exist, so the mapping from the current spreadsheets is one-to-one. Rows shaded green mark records or fields that are new versus the current trackers.

1.1 Objectives

- **Centralise the operating data.** Companies, deals, advisory engagements, investors, contacts, partners, service providers, documents, tasks and communications in one structured system.
- **Speed up investor matching.** Match mandates to investors on sector, geography, ticket size, instrument and live deployment status from a single investor database.
- **Capture channel signal.** Pull the relevant updates and action points out of WhatsApp and email and log them against the right deal.
- **Qualify inbound automatically, behind a human gate.** A website agent that collects structured information, runs first-pass qualification, and routes qualified opportunities to a deal lead.
- **Give investors controlled visibility.** A mechanism for investors to see opportunities that fit their criteria, with confidentiality gates and Noblestride approval.
- **Make the pipeline visible.** Dashboards across mandates, investor engagement, deal progression, referral activity and team workload.

1.2 Scope at a glance

#	Component	What it does
1	CRM & Deal Management	Central system for all core records, relationships, audit trails and tagging.
2	Client Agent	Handles inbound client correspondence and feeds intake and onboarding.
3	Investor Agent	Manages investor correspondence and outreach; keeps investor records current.
4	Investor Tracker Agent	Tracks the investor-to-deal relationship through to close and disbursement.
5	Referral / Partner Tracking Agent	Captures referral sources, partners, fee-sharing and conversion.
6	WhatsApp Integration	Structures inbound WhatsApp correspondence into the CRM.
7	Website Intake & Qualification Agent	Collects information, runs first-pass qualification, routes qualified leads.
8	Investor Deal Visibility	Controlled investor view of matching mandates, with confidentiality

#	Component	What it does
		gates.
9	Reporting & Dashboards	Operational visibility across the business.

All four agents run on the appropriate channels for the task: WhatsApp, Slack, email and web chat.

PART II · DATA MODEL & CONFIGURATION

2. Entity catalogue and relationships

The system manages the record types below. Service Provider is new versus the current trackers; the Investor-Deal Engagement link record formalises what the Term Sheet Deals tab already holds. Advisory Engagement is specified as an optional add-on and is not part of committed PoC scope unless confirmed in discovery. The rest map directly to existing Noblestride spreadsheets.

Entity	Source today	Role
Company / Target	Deal tabs, intake form	The client raising capital or seeking advisory. Central anchor.
Deal / Mandate	All Deals + per-lead tabs	A fundraising transaction.
Advisory Engagement (optional)	Advisory Work tab	Non-fundraising advisory mandate, valued in KES. Optional add-on, pending confirmation.
Investor	Investor Tracker (Contacts VC PE DFI)	Capital provider: PE, VC, DFI, corporate, lender, individual.
Investor Contact	Investor Tracker	Named people inside each investor.
Referral / Partner	Engagement tracker (Source/Referee), referral trackers	Originators and introducers of deals.
Service Provider	Law Firms tab	Legal, audit, tax, ESG and technical advisors on a deal.
Task	Tasks Tracker (WhatsApp)	Action items and follow-ups.
Document	Deal tabs (Teaser/IM/Model/VDR), engagement tracker	Deal and entity documents.
Communication	WhatsApp / email / meetings	Logged correspondence, anchored to a deal.
Investor-Deal Engagement	Term Sheet Deals tab	Link record: investor engagement and disbursement per deal.

2.1 Relationship rules

- The Company / Target is the central anchor. Every communication, document and task ties back to a deal, and every deal ties back to a company.
- One deal is one communication universe. Clients, investors and partners meet through the deal.
- Investor-to-deal links are held in the Investor-Deal Engagement record, which carries matching state, term sheets and disbursement.
- A company can hold both fundraising Deals and Advisory Engagements.
- Partners and Service Providers link to one or many deals; partner identity is internal-only and never exposed to investors.

3. Data dictionary

Field names follow Noblestride's existing column names where they exist. Type abbreviations: Picklist (single-select controlled value), Multi (multi-select), Lookup (relationship to another record), Auto (system-generated). Picklist values are listed in section 4.

3.1 Company / Target

Field	Type	Req	Values / source / notes
Company ID	Auto	Y	System unique key.
Project codename	Text	Y	Internal alias used on deal tabs, kept separate from legal name for confidentiality.
Legal name	Text	Y	Registered company name.
Registration no.	Text	N	CR12 / CR10; link to uploaded document.
Year founded	Number	N	Used in the 3-year operating test.
HQ city / country	Text	Y	
Countries of operations	Multi	N	Geographic footprint.
Sector	Picklist	Y	Sector list (4.7).
Sub-sector	Picklist	N	Sector taxonomy (section 5).
Core product / service	Text	Y	
Description	Long text	Y	
Business model	Long text	N	
Founders, gender	Multi	N	Source for women-led impact flag.
Founders, nationality	Text	N	
Ownership / shareholding	Long text	N	
Directors / management	Long text	N	
Target clients	Text	N	
Years of operation	Number	N	Derived from year founded.
Staff / branches	Number	N	
Last year revenue (USD)	Currency	N	Qualification input.
Revenue forecast (USD)	Currency	N	
EBITDA / net profit	Currency	N	Qualification input.
Profitability	Picklist	N	Profitable / loss-making.
Existing debt	Currency	N	
Loan book (FIs)	Currency	N	For financial institutions.
Total assets	Currency	N	From intake form.
Primary contact	Lookup	Y	Contact record.
Website / social	Text	N	
Origination source	Picklist	Y	Source list (4.6).
Impact flags	Multi	N	Women-led, youth-led.

Field	Type	Req	Values / source / notes
Status	Picklist	Y	Active / prospect / archived.

3.2 Deal / Mandate

Field	Type	Req	Values / source / notes
Deal ID	Auto	Y	Unique, immutable.
Project	Text	Y	Codename shown on deal tabs.
Company	Lookup	Y	Company / Target.
Deal type	Picklist	Y	Debt / Equity / Equity & Debt.
Instrument	Picklist	N	Debt / Equity / Mezzanine / Grant / Hybrid.
Target profile	Text	N	Short descriptor.
Max selling stake	Picklist	N	Minority / Majority / Full Sale / N/A (equity).
Ticket size (USD Mn)	Number	Y	Amount being raised.
Use of funds	Long text	N	
Sector	Picklist	Y	Inherited from company; editable.
Status	Picklist	Y	Open / On Hold / Closed / Dropped / Closed & Reopened / Closed & On Hold.
Deal stage	Picklist	Y	Pipeline stage (4.4).
Deal milestone	Picklist	N	Current milestone (4.3).
Deal lead	Lookup	Y	Team member.
Deal assistant	Lookup	N	Team member.
Consultant / referrer	Lookup	N	Partner record; internal-only.
Date onboarded	Date	Y	Immutable once set.
Source	Picklist	Y	Origination source (4.6).
Teaser	Picklist	N	Not started / Draft / Done.
IM	Picklist	N	Not started / Draft / Done.
Model	Picklist	N	Not started / Draft / Done.
VDR	Text / link	N	Data room status and link.
Probability of closure	Percent	N	
Comments	Long text	N	

3.3 Advisory Engagement (optional add-on)

Optional, not committed scope. Noblestride also runs non-fundraising advisory mandates (valuations, DD reports, business plans) valued in KES, currently in the Advisory Work tab. This is not part of the committed PoC scope. The structure is specified here so that, if the team chooses to include it, adding it is a switch rather than a redesign.

Field	Type	Req	Values / source / notes
Engagement ID	Auto	Y	
Company	Lookup	Y	Company / Target.
Project type	Picklist	Y	Advisory type (4.8).
Company profile	Long text	N	
Project value (KES)	Currency	Y	Fee value in KES.
Date onboarded	Date	Y	
Due date	Date	N	
Project lead	Lookup	Y	Team member.
Project assistant	Lookup	N	Team member.
Project milestone	Picklist	N	Advisory milestone (4.9).
Status	Picklist	Y	Aligned with deal status values.
Comments	Long text	N	

3.4 Investor

Field	Type	Req	Values / source / notes
Investor ID	Auto	Y	
Firm / fund name	Text	Y	
Institution type	Picklist	Y	PE / VC / DFI / Corporate / Lender / Individual / Family office.
Website	Text	N	
Sector focus	Multi	Y	Matching input.
Geographic focus	Multi	Y	Matching input.
Country restrictions	Text	N	Exclusions.
Ticket size min (USD)	Currency	Y	Matching input.
Ticket size max (USD)	Currency	Y	Matching input.
Instruments	Multi	Y	Debt / Equity / Mezzanine / Grant.
Deployment status	Picklist	Y	Active / Not deploying / On hold.
Investment mandate	Long text	N	Fund criteria.
Stage preference	Picklist	N	
Target return / IRR	Text	N	
Shareholding preference	Picklist	N	Minority / Majority.
Min EBITDA / revenue / loan-book	Currency	N	Threshold(s).

Field	Type	Req	Values / source / notes
Pricing preference	Text	N	
ESG / impact focus	Text	N	
Current fund size / deployable	Currency	N	
Remaining investment period	Text	N	
DD requirements / timeline	Long text	N	
IC / approval process	Long text	N	
Track record	Long text	N	Notable investments, exits.
NDA status (Noblestride)	Picklist	Y	None / Open NDA / Closed NDA.
Engagement classification	Picklist	Y	Active / Inactive / On hold / Excluded / Greylisted. Drives visibility (section 13).
Next action date	Date	N	
Feedback	Long text	N	
SSA-region contact	Lookup	N	Investor Contact.

3.5 Investor Contact

Field	Type	Req	Values / source / notes
Contact ID	Auto	Y	
Investor	Lookup	Y	Parent investor.
Name	Text	Y	
Role	Text	N	
Email	Email	Y	Per Noblestride note, flag/avoid generic Gmail/Yahoo for fund contacts.
Phone	Phone	Y	Used for OTP where relevant.
Primary contact	Boolean	N	
SSA contact	Boolean	N	Region-specific point person.

3.6 Referral / Partner

Field	Type	Req	Values / source / notes
Partner ID	Auto	Y	
Name	Text	Y	
Advisor type	Picklist	N	Lawyer / Investor / Consultant / Transaction advisor / Advisory firm / Other.
Organization	Text	N	
Email	Email	Y	
Phone	Phone	Y	
Fee-sharing agreement	Boolean	N	
Fee-sharing terms	Long text	N	
NDA / partner agreement	Picklist	N	None / Sent / Signed.
Deals introduced	Lookup (multi)	N	Deals.
Internal-only	Boolean	Y	Default true. Identity never exposed to investors.
Status	Picklist	N	Active / Inactive.

3.7 Service Provider

New record type. From the Law Firms tab and the DD workflow (Big 4 and legal advisors). Lets the agents file legal, audit, tax and ESG advisors against a deal instead of losing them in notes.

Field	Type	Req	Values / source / notes
Provider ID	Auto	Y	
Name	Text	Y	
Type	Picklist	Y	Law firm / Audit (Big 4) / Tax / ESG / Technical / Other.
Contact person	Text	N	
Email / phone	Email / Phone	N	
Profile	Long text	N	

Field	Type	Req	Values / source / notes
Engaged on	Lookup (multi)	N	Deals.
Fee / amount	Currency	N	
Status	Picklist	N	

3.8 Task

Field	Type	Req	Values / source / notes
Task ID	Auto	Y	
Linked record	Lookup	Y	Project / Client / Investor (deal, company or investor).
Action point	Text	Y	
Source	Picklist	Y	Monday Meeting / WhatsApp / Email / Verbal / Other.
Status	Picklist	Y	Not started / Pending / Ongoing / Done / Dropped.
Deadline	Date	N	Drives overdue escalation.
Owner	Lookup	Y	Team member.
Assistant	Lookup	N	Team member.
Notes	Long text	N	
Escalation flag	Boolean	Auto	Set when overdue (section 12).

3.9 Document

Field	Type	Req	Values / source / notes
Document ID	Auto	Y	
Linked record	Lookup	Y	Deal / company / investor.
Type	Picklist	Y	NDA / Engagement contract / Teaser / IM / Financial model / Valuation / Pitch deck / Audited accounts / CR12 / Term sheet / Loan agreement / SPA / SHA / Other.
Version	Text	N	
Access level	Picklist	Y	Internal / Client-shared / Investor-shared / VDR. Enforced by access control (section 6).
Status	Picklist	N	Draft / Under review / Approved / Shared / Executed.
File	File	Y	
Uploaded by / date	Auto	Y	

3.10 Communication

Field	Type	Req	Values / source / notes
Comm ID	Auto	Y	
Channel	Picklist	Y	WhatsApp / Email / Slack / Web chat / Call / Meeting.
Linked record	Lookup	Y	Deal / company / investor.
Direction	Picklist	N	Inbound / Outbound.
Summary	Long text	Y	Structured by the agent.
Extracted action items	Lookup (multi)	N	Tasks created from this communication.
Timestamp	DateTime	Y	
Logged by	Auto	Y	Agent or user.

3.11 Investor-Deal Engagement (link record)

This link record carries the investor-to-deal relationship and the disbursement tracking from the Term Sheet Deals tab. One record per investor per deal.

Field	Type	Req	Values / source / notes
Link ID	Auto	Y	
Investor	Lookup	Y	
Deal	Lookup	Y	
Engagement stage	Picklist	Y	Shared / Teaser sent / NDA signed / IM shared / VDR access / Meeting / Info request / DD / Term sheet / Offer / Invested / Declined.
Interest level	Picklist	N	Low / Medium / High.
NDA type	Picklist	N	Open / Closed.
Term sheet issued	Boolean	N	With issue date.
Total amount (USD Mn)	Currency	N	From Term Sheet Deals.
Amount disbursed (USD Mn)	Currency	N	
Amount pending (USD Mn)	Currency	N	
Engagement status	Picklist	N	Disbursed / Ongoing / Fell off / Dropped.
Date received	Date	N	
Year / Quarter	Auto	N	Derived from date received.
Probability of closure	Percent	N	
Feedback	Long text	N	

4. Controlled-value (picklist) library

These values are taken from Noblestride's existing list tabs. They are the starting configuration; the team can extend them. Team-member name lists are managed as a User picklist and will be set at kickoff.

4.1 Deal type

Debt; Equity; Equity & Debt.

4.2 Investment instrument

Debt; Equity; Mezzanine; Grant; Hybrid / combination.

4.3 Deal milestone

Term Sheet; Non-Binding Offer; Loan Agreement; SPA / SHA; Due Diligence; IC; TA; Closed.

4.4 Deal stage

Indicative TS; Term Sheet; Due Diligence; IC; Loan Agreement; Shareholder Agreement; Share Purchase Agreement; TA; Closed.

4.5 Deal status (pipeline)

Open; On Hold; Closed; Closed & Reopened; Closed & On Hold; Dropped.

4.6 Origination source

Referral; Direct enquiry; Consultant; Investor; Partner; Social media (LinkedIn / WhatsApp); Website; Networking event; Internal business development.

4.7 Max selling stake

Minority; Majority; Full Sale; N/A.

4.8 Advisory project type

Valuation Report; Financial Due Diligence Report; Business Plan; Expression of Interest; Financial Model; Advisory Support; Pitch Deck; Merger Report; Financial Model & Business Plan; Business / Project Proposal; Concept Note.

4.9 Advisory project milestone

Client Engagement; Draft; 1st Draft Shared; Ongoing; Completed; Dropped.

4.10 Engagement status (investor-deal / disbursement)

Disbursed; Ongoing; Fell off; Dropped.

4.11 Task status

Not started; Pending; Ongoing; Done; Dropped.

4.12 Task source

Monday Meeting; WhatsApp; Email; Verbal; Other.

4.13 Investor deployment status

Active / Deploying; Not deploying; On hold.

4.14 Investor engagement classification

Active; Inactive; On hold; Excluded; Greylisted.

4.15 NDA type

Open (investor ↔ Noblestride, multi data room); Closed (investor ↔ Noblestride ↔ client, single data room).

4.16 Document access level

Internal; Client-shared; Investor-shared; VDR.

5. Sector taxonomy

Operational sector picklist (deal and company level), from the current deal lists:

Agribusiness; Aviation; Construction; Education; Energy; Financial Services; Healthcare; Hospitality; Infrastructure; Leasing; Manufacturing; Media & Entertainment; Real Estate; Retail & FMCG; Services; Technology; Transport & Logistics; Water & Sanitation.

Sub-sectors are available as a second-level picklist from Noblestride's sector document (for example, under Financial Services: Insurance, Banks, Microfinance, Pension funds, VC & PE; under Technology: Fintech, Edtech, Agritech, Healthtech, Insuretech, E-commerce, PropTech, Cybersecurity). The full sub-sector list is configured from that document.

Note: real estate, oil & gas, mining, alcohol, tobacco and gambling are excluded sectors for qualification (section 11). Real Estate appears in the sector list because legacy advisory records reference it; the qualification rules still screen it out for new fundraising leads.

6. Milestone framework

Milestones drive deal progression, the visibility gates and the dashboards. They split into client-side document preparation, investor-side process, and post-deal.

6.1 Client-side document preparation

Milestone	Applies to
Teaser	All deals
Financial model	All deals
Information Memorandum (IM)	All deals
Valuation report	Equity transactions
Business plan	Optional

6.2 Investor-side process milestones

#	Milestone
1	Receipt and review of the teaser
2	Execution of the NDA
3	Expression of interest / letter of intent / email confirming interest
4	Data room access
5	Preliminary due diligence
6	Internal IC paper
7	First IC approval
8	Issuance of non-binding term sheet
9	Execution of the term sheet
10	Onsite detailed due diligence (financial, tax, commercial, ESG, legal)
11	Second IC approval
12	Issuance of a binding offer
13	Loan agreement or share purchase agreement
14	Competition authority approval (CAK / COMESA)

6.3 Post-deal

- Disbursement / transaction completion.
- Success-fee invoicing and payment.
- Post-transaction monitoring and relationship management.

7. Audit, immutability and access control

7.1 Immutable / audited fields

Where a protected field changes, the system keeps the prior value, the timestamp and the user who made the change.

- Core identifiers on companies, investors, partners and contacts: legal names, registration details, primary contacts.
- Deal records: creation date, originating source and unique deal ID.
- Investor interest records: expressions of interest, rejections and offer terms shared.
- Deal stage history: every stage change with timestamp and responsible user.

7.2 Roles and access matrix

Access is role-based and enforced at the data layer. C = create, R = read, U = update, n/a = no access. External roles see only what the visibility rules (section 13) permit.

Entity	Admin	Deal lead	Team member	Investor (ext.)	Partner (ext.)
Company / Target	CRU	CRU (own)	R	gated	n/a
Deal / Mandate	CRU	CRU (own)	R	gated	n/a
Advisory Engagement	CRU	CRU (own)	R	n/a	n/a
Investor	CRU	CRU	R	own profile	n/a
Investor Contact	CRU	CRU	R	n/a	n/a
Referral / Partner	CRU	CRU	R	n/a	own
Service Provider	CRU	CRU	R	n/a	n/a
Task	CRU	CRU	CRU (own)	n/a	n/a
Document	CRU	CRU	R	gated	n/a
Investor-Deal Engagement	CRU	CRU	R	own	n/a

Hard rule: partner / consultant identity and the identity of other investors on a deal are never visible to any external role, regardless of gate. Excluded and greylisted investors see nothing.

PART III · AGENTS & INTEGRATIONS

8. Agent specifications

Each agent is specified by what fires it, the channels it runs on, what it reads, what it does, what it writes to the CRM, the human gate, and what it must never do. The agents prepare, route and track. People decide and release.

8.1 Client Agent

Aspect	Specification
Purpose	Handle inbound client and prospect correspondence; structure it; feed intake and onboarding.
Channels	WhatsApp, email, web chat.
Trigger	Inbound message from a prospect or client; a new website-qualified lead.
Reads	Message content, attachments, existing Company / Deal records.
Does	Classifies the message; extracts intake fields against the checklist (section 9); drafts a summary and next steps; flags qualification signals.
Writes	Creates / updates Company and Communication records; creates Tasks for the deal lead; attaches Documents.
Human gate	Deal lead reviews and progresses. No onboarding, NDA or contract action without approval.
Never	Sign or accept NDAs/contracts; onboard a client; convert a lead to an active deal; commit the firm to anything.

8.2 Investor Agent

Aspect	Specification
Purpose	Manage investor correspondence and outreach; keep investor records current.
Channels	Email, WhatsApp, Slack.
Trigger	Inbound investor message; a mandate ready for outreach; a change in investor criteria detected.
Reads	Investor profile, mandate, Investor-Deal Engagement, deal data.
Does	Captures changes to investor criteria/status/contacts; prepares tailored deal introductions and teasers for matching investors; logs feedback and response times.
Writes	Updates Investor and Investor Contact; creates Communication and Investor-Deal Engagement records; drafts outreach for review.
Human gate	Deal lead reviews and releases all initial outreach. Material profile changes prompt confirmation.
Never	Send initial investor outreach automatically before interest is verified; share confidential client data; route investor data requests to clients before a formal introduction.

8.3 Investor Tracker Agent

Aspect	Specification
Purpose	Track the investor-to-deal relationship through to close and disbursement.

Aspect	Specification
Channels	Runs in the CRM; reads from email/WhatsApp via the Communication log.
Trigger	Any change to an Investor-Deal Engagement; scheduled follow-up checks.
Reads	Investor-Deal Engagement, milestones, term sheets, documents.
Does	Maintains engagement stage per investor per deal; tracks term sheets, DD status and disbursement; surfaces which investors fit a live mandate; flags stalled or overdue engagements.
Writes	Updates Investor-Deal Engagement (stage, term sheet, amounts, status); creates follow-up Tasks.
Human gate	Deal lead acts on flags; status changes that affect a client are reviewed.
Never	Grant VDR access automatically; share a deal with an excluded investor; issue or accept commercial terms.

8.4 Referral / Partner Tracking Agent

Aspect	Specification
Purpose	Capture introductions, partner relationships, fee-sharing and conversion.
Channels	Email, WhatsApp.
Trigger	A partner introduces a deal; a referred deal changes stage.
Reads	Partner records, linked deals, deal stage history.
Does	Records the originator, contacts, advisor type and fee-sharing; tracks referral-to-onboarded conversion and stage per referred deal; compiles partner performance.
Writes	Creates / updates Partner records and partner-to-deal links; updates conversion metrics.
Human gate	Advisor-to-Noblestride deal sharing is reviewed by a person, never auto-actioned.
Never	Expose partner / consultant identity to investors; act on fee-sharing without a recorded agreement.

9. WhatsApp correspondence integration

The integration connects to Noblestride's existing WhatsApp workflows and classifies inbound messages, routing the relevant ones into the CRM. The mapping below is the configuration starting point.

Inbound signal	System action	Writes to
Deal status update (e.g. DD, term sheet, closing)	Update deal stage / milestone; log communication	Deal, Communication
Client / investor / transaction update	Log against the right deal	Communication, Deal
Task or follow-up assigned in chat	Create a linked task for the deal lead	Task
Assigned or potential deal mentioned	Route to the deal manager's queue	Deal, Task
Overdue / missed deadline	Flag and escalate	Task (escalation flag)
Client / investor data or status request	Open a tracked workflow with assignment and monitoring	Task, Communication

9.1 Never automated from WhatsApp

- Internal team discussions and deal allocations.
- Sensitive or personal conversations in groups.
- Investor data requests routed to clients before a formal introduction.
- Initial investor communications before interest is verified.
- Advisor-to-Noblestride deal sharing.
- Any commercial negotiation or clarification of terms.

10. Website intake and qualification agent

Embedded on the website, the agent collects structured information, runs first-pass qualification, and routes qualified opportunities to the team. It does not onboard anyone.

10.1 Intake fields

From Noblestride's target-company data collector. Required fields are marked.

Field	Req	Field	Req
Legal name	Y	Amount raising (current round)	Y
Year founded	Y	Instrument (debt/equity/mezzanine)	Y
HQ city	Y	Expected post-money valuation	N
Countries of operations	Y	Raised to date (current round)	N
Sector	Y	Raised to date (since inception)	N
Core product / service	Y	Existing investors	N
Description	Y	Last year revenue (USD)	N
Founders, gender	Y	Revenue forecast this year (USD)	N
Founders, nationality	Y	Profitability	N
Target clients	Y	Pitch deck (upload)	N
Contact person / role / email	Y	Origination source / website	N
NDA acceptance (before sensitive docs)	Y	Notes	N

10.2 Qualification logic

The agent screens against the firm's published criteria and labels each lead Qualified or Rejected for human review. It never auto-rejects without the lead being visible to the team.

Qualifies for review	Deprioritised / rejected
Profitable, positive EBITDA	Start-up / early-stage, no revenue or <3 yrs history
Clean audited accounts 3+ years	No audited accounts for last 3 years
Annual revenue ≥ USD 1M	Annual revenue < USD 1M
Funding need ≥ USD 1M (debt or equity)	Raise < USD 500k
Use of funds: growth, CAPEX, working capital	Restricted sectors: oil & gas, real estate, gambling, alcohol, tobacco, mining
Acceptable sector, Sub-Saharan Africa	Outside Sub-Saharan Africa
Fits investor appetite & internal criteria	Government-owned or PEP-linked

10.3 Routing after qualification

A qualified lead is held in an open queue and assigned to a deal lead manually. The human process then takes over: introductory call, NDA, financial review, assessment, engagement contract, entry into the formal process. No lead converts to an active deal automatically.

11. Investor deal visibility

Investors see mandates that fit their criteria, with confidentiality gates. Access is granted and revocable by Noblestride, not a default. Visibility is field-level and tied to the engagement gate.

Field / document	Pre-interest	After NDA	DD stage
Company profile, sector, target profile	Visible	Visible	Visible
Deal type, requested ticket size	Visible	Visible	Visible
Revenue, EBITDA, total assets, use of funds	Limited	Visible	Visible
Status of matching active mandates	Visible	Visible	Visible
Full financials, IM, financial model	Hidden	Visible	Visible
VDR / due-diligence files	Hidden	On request	Visible
Advisor and client contacts	Hidden	Hidden	Visible
Other investors on the deal	Hidden	Hidden	Hidden
Engagement contracts	Hidden	Hidden	Hidden
Investor feedback / offers / client responses	Hidden	Hidden	Hidden
Internal team messages	Hidden	Hidden	Hidden

11.1 Filters available to investors

Country; sector; ticket size; deal type and facility type; core financials (revenue, EBITDA, net profit); impact filter (women-led, youth-led).

11.2 Access model and controls

- All active investors get baseline visibility and filter to what fits their focus; they are not hard-siloed by type.
- Noblestride keeps back-end control to limit, restrict or deactivate access for investors on hold, inactive or excluded.
- VDR access stays locked until an investor expresses formal interest and signs an NDA, and is revoked promptly if they decline.
- Excluded and greylisted funds never see opportunities.

12. Automation guardrails and escalation

Human-in-the-loop control is part of the build, not a setting. The lists below are binding.

12.1 Actions that never happen automatically

1. Signing or accepting NDAs and engagement contracts.
2. Onboarding a client before initial review, financial analysis and management approval.
3. Converting a lead into an active deal before criteria are validated and a deal lead is assigned.
4. Accepting, rejecting or deprioritising an opportunity without management oversight.
5. Sharing confidential client information with investors, stakeholders or third parties.
6. Granting VDR access without internal approval and a confirmed, signed NDA.
7. Sharing a deal with an excluded investor or a party that fails internal clearance.
8. Sharing a deal with consultants or partners without an NDA and, where applicable, a fee-sharing agreement.
9. Sending external communications without internal review and approval.
10. Committing the firm to timelines, fees, terms, exclusivity, deliverables or any binding obligation.

12.2 Escalation triggers

- Overdue or missed deadlines.
- Any deal status change.
- Internal WhatsApp task assignments, which auto-create a linked to-do for the deal lead.
- Client or investor requests, which open a tracked workflow with assignment and monitoring.
- Requests for internal review of a deliverable such as a financial model or teaser.

PART IV · REPORTING, DELIVERY & COMMERCIAL

13. Reporting and dashboards

Dashboard	Fields / groupings
Pipeline overview	Active vs inactive deals; deals by lead; by transaction type; by sector; by ticket-size band.
Deal status	Distribution across screening, term sheet issued, closed, rejected; deal stage history.
Investor engagement	Deals under review by each investor; deals rejected; invested/completed; historical engagement summary.
Disbursement	Total / disbursed / pending by deal, investor, year and quarter.
Referrals & partners	Deals introduced by each partner; status of each; conversion (introduced → progressed → closed/rejected).
Team & tasks	Deal load by team member; task status by owner; overdue actions.
Advisory	Advisory engagements by type, value (KES), lead and milestone.

14. Systems and integrations

Noblestride runs on Microsoft 365 (SharePoint, Outlook, Excel, PowerPoint, Teams), WhatsApp, LinkedIn, Microsoft To Do and Google Meet / Zoom. The platform fits this environment.

14.1 Integrations in scope

- WhatsApp, for the correspondence integration (section 9).
- Email (Outlook / Microsoft 365), for capturing relevant deal and investor correspondence.
- Slack and web chat, as agent channels.
- The website, for the embedded intake and qualification agent.
- Document storage (for example SharePoint), subject to available API and admin access (section 17).

14.2 Data protection

- Role-based access control (section 7) and confidentiality gates enforced at the data layer.
- Alignment with Kenya's Data Protection Act, 2019: access rights, secure storage, confidentiality, data handling.
- Encryption in transit and at rest, audit trails and incident response per the Enterprise Agreement and its DPA (Appendix C).

15. Deliverables

Deliverable	Description
Discovery & configuration brief	Validated workflows, this data model confirmed, access matrix and integration plan, signed off before build.
Configured CRM	All core entities, relationships, audit trails, picklists and tagging.
Four deployed agents	Client, Investor, Investor Tracker and Referral/Partner agents on their channels.
WhatsApp integration	Inbound structuring and logging with the rules in section 9.
Website intake & qualification agent	Form, qualification logic and routing in section 10.
Investor deal visibility	Controlled investor view with filters and gates in section 11.
Reporting dashboards	The views in section 13.
Access controls & DPA configuration	Roles, gates and data-protection settings.
Onboarding & handover	Team walkthrough, configuration documentation, PoC support setup.

16. Approach and timeline

The implementation runs 4 to 6 weeks from the Effective Date, inside the 3-month Proof of Concept in Appendix A.

Phase	Timing	Focus
1. Discovery & scoping	Weeks 1-2	Validate this data model and workflows, confirm open items (section 17), set the access matrix and integrations.
2. Build & configuration	Weeks 2-5	Configure the CRM and entities, build and connect the agents, set up WhatsApp and website integrations, implement visibility and access controls.
3. Deployment & onboarding	Weeks 5-6	Deploy, load and structure existing data, walk the team through, begin the PoC.
PoC period	Months 1-3	Run on live operations, refine, review usage ahead of post-PoC terms.

17. Items to confirm together in discovery

A short list of decisions and details we will lock in together during the discovery workshop. None of them block the start of configuration; they refine specific pieces of the build.

#	Item	What we will confirm
1	Advisory work in or out of PoC scope	Whether to include Advisory Engagement (section 3.3) in this PoC.
2	Final picklist values & team-member (User) list	Confirm the controlled values and set the User list at kickoff.
3	Full Term Sheet Deals semantics	Walk through the disbursement tracking together to confirm the finer points.
4	Full investor field set	Confirm the investor fields are complete and which are required.
5	Sub-sector taxonomy depth	Agree how many sub-sector levels to configure.
6	API / admin access per system	Confirm SharePoint, Outlook and WhatsApp access at kickoff.
7	Access coordinator	Confirm the owner (Evans Wesonga / Solomon named as candidates).
8	Open vs Closed NDA handling in visibility	Agree how each NDA type maps to VDR access scope.

18. Roles and responsibilities

Area	Lua	Noblestride
Discovery & sign-off	Run workshops, confirm the data model	Provide detail, attend, sign off the brief
Build & configuration	Configure platform, build agents	Confirm configuration decisions
System access	Specify access required	Nominate coordinator; provide timely API/admin access
Data	Structure and load data	Provide trackers, files, templates; confirm data quality
Approvals & content	Build routing and gates	Make all approval and release decisions
Support (PoC)	Provide support per the SLA (Appendix B)	Raise issues via the designated contact

Designated contacts. Lua: Lorcan O’Cathain (lorcan@heylua.ai). Noblestride: Evans Wesonga, CEO (evans.wesonga@noblestride.co.ke).

19. Assumptions, dependencies and out of scope

19.1 Assumptions and dependencies

- Timely access to systems, channels, data and people through the nominated coordinator.
- Existing trackers, templates and files made available for the data load.
- API / admin access available for integrated systems, or an agreed alternative.
- Approval and release decisions made within reasonable timeframes.
- Third-party channel costs (WhatsApp, SMS, voice) are Noblestride's, per the Enterprise Agreement.

19.2 Out of scope

- Workflows, integrations or functionality beyond what is described here.
- Advisory engagement tracking (section 3.3), unless confirmed as an add-on in discovery.
- Automated production of investor documents (teasers, IMs, models, valuations); the system tracks and stores them, the team produces them.
- Migration or restructuring of historical data beyond the agreed initial load.
- Outbound automated commercial communication or negotiation.
- Custom integrations with systems not listed in section 14.

20. Commercial terms

This SOW operates under the Enterprise Agreement dated 15 May 2026. The commercial terms (implementation fee, monthly minimum commitment, usage thresholds, initial term, the 3-month Proof of Concept and the Month 3 break clause) are set out in Appendix A of that Agreement and are not restated here. Appendix A governs.

Additional workflows, integrations or functionality beyond the scope described in this document may be scoped and commercially agreed separately, per Appendix A.

21. Acceptance

By signing below, both parties confirm this Scope of Work and build specification as the agreed basis for configuration under the Enterprise Agreement dated 15 May 2026.
